Adir Cohen

Senior Full-Stack Developer & Software Architect

AI-Driven B2B Platforms · ERP Integrations · Real-Time Systems

PROFILE

Senior software architect who designs and delivers AI-driven B2B platforms and deep ERP integrations, from architecture to production. Co-founder of Onebtn, a B2B SaaS platform serving 60+ businesses, with end-to-end delivery across medical, HR-tech, hospitality, travel and defense.

CORE STRENGTHS

AI-Driven Platforms

Platforms operated end to end through AI: processes, workflows, interfaces and integrations.

ERP Integrations

Deep integrations with Priority, SAP Business One and other leading ERP systems.

Real-Time Systems

Real-time, map-based monitoring and control with live data.

End-to-End Ownership

Architecture, product, engineering, DevOps and production for web and mobile.

EXPERIENCE

Co-Founder & Software Architect

2016 – Present

Onebtn (OneButton) · B2B SaaS Platform

- Co-founded Onebtn and lead the architecture of its AI-driven B2B SaaS platform, serving 60+ businesses.
- Architected the platform to be fully operable through AI, from business processes and workflows to interfaces and integrations.
- Own deep ERP integrations with Priority, SAP Business One and other leading ERP systems.
- Multi-tenant platform with web and mobile apps, covering orders, inventory, customers and sales agents.
- Own the full lifecycle end to end: architecture, product, engineering, DevOps and production.

Senior Full-Stack Developer & Software Architect

2023 – Present

AC · Independent Practice

- Architect and deliver end-to-end web, mobile and AI systems for clients in medical, HR-tech, hospitality and travel.
- Built monitoring and control modules, machine integrations, and test-inventory and patient management for a medical system.
- Built an AI-based hiring (HR-tech) platform.

Senior Full-Stack Developer

2020 – 2023

Freelance · Defense Sector

- Built a real-time, map-based monitoring and control system for the defense sector.
- Delivered live data processing of event indications from a detection system into an interactive map.
